

DOIT MASTER AGREEMENT NUMBER:

B-03-006

DOIT APPROVAL DATE:

10/1/2003

**VENDOR NAME: SBC SNET****FEIN: 06-054-26-46****SERVICE/PRODUCT NAME: Local Exchange Service: Analog Trunks – CentraLink 1100****SERVICE/PRODUCT DESCRIPTION:**

CentraLink 1100 is an office telecommunications system for businesses that uses a separate dedicated line between each telephone at your premises and the switching equipment at the SBC SNET central office. CentraLink 1100 can also be programmed as ground start and be provisioned as incoming, outgoing or two-way trunks to be used with a customer's telephone system.

**Features include:**

- **Direct Inward Dialing and Direct Outward Dialing** allows you to route calls directly or through an attendant.
- **Hunting** automatically sends an incoming call from a busy line to the next designated line.
- **Station Line Identification** provides a detailed record of calls made by each CentraLink station - including start time, duration, and toll call numbers.
- **Call Forwarding-Variable** automatically forwards calls wherever you like, inside or outside your business.
- **Call Forwarding-Busy Line** automatically reroutes calls to a designated station or your voice mail if your line is busy.
- **Call Forwarding-Don't Answer** automatically reroutes calls to another phone if you haven't responded within a preset number of rings.
- **Consultation** allows you to place a caller on hold and call another party to confer on the matter at hand or gather additional information--privately without your original party hearing, and without the need for additional lines or sophisticated hardware.

**SERVICE LEVELS:****Installation Intervals**

Less than 10 lines = 9 business days

10 or more lines = Individual Case Basis

**Routine Repair Intervals**

Response time = Less than 1 hour

Repair Resolution time = 5.5 hours or less

**Repair Service Level Definitions:**

Repair Response is the time elapsed between when SNET receives a report of a problem or otherwise becomes aware of a problem, and the time that SNET responds to the end user or other designated contact to verify the problem. It is calculated during a measurement period as an average time (expressed in hours and minutes of the Repair Response intervals) for all problems related to a particular network service for the State's entire network.

Repair Resolution Time means the elapsed time between when the State notifies SNET of a problem, and the time that SNET restores service and such service is acceptable to the State. It is calculated during a measurement period and is expressed as an average time (expressed in hours and minutes of the Repair Resolution intervals) for all problems of a particular network service for the State's entire network.
